3. MAIN PRINCIPLES	2

## INTRODUCTION

We know the importance of a consistent, effective and transparent communication model to achieve global success in line with our organizational goals. For this reason, we have established a comprehensive Global Environmental Policy to communicate with all our stakeholders in an open, transparent and reliable manner. Within the scope of this policy, we set out our approaches to protecting the environment in our operations and all other processes in every geography where we operate.

## 1. PURPOSE

With this policy, we determine the approach and basic principles for protecting and improving the environment in our company's strategy, operations, investments and business processes within the scope of our sustainability goal. With this policy, we aim to establish an environmental management system in line with the United Nations Sustainable Development Goals, the UN Global Compact and ESG.

## 2. SCOPE

This policy covers managers and employees in all countries where our company operates.

## 3. MAIN PRINCIPLES

- We see the protection of nature and the environment as an integral part of our mission of “Producing reliable, sustainable and value-adding energy solutions”.
- In order to achieve the vision we have set, we see sustainability and the development of the environment in this context as an important driving force.
- We establish and effectively implement an environmental management system in compliance with the United Nations Sustainable Development Goals, UN Global Compact, ESG, national and international environmental regulations and standards and best practices.

- We make investments and develop solutions in clean energy, energy efficiency, innovative energy technologies and smart grids in order to contribute to sustainable development goals, support the global energy transformation, prioritize the fight against the climate crisis and achieve “carbon neutral” targets.
- We respect people and the environment. Our main priority is to leave a clean and healthy environment for future generations.
- We act proactively in protecting the environment. We make environmental awareness a part of our corporate culture.
- We ensure the efficient use of natural resources in all our processes.
- With our business model and practices that respect nature, biodiversity, historical and artistic heritage, we respond to our stakeholders' expectations regarding environmental protection and support transparency.
- We protect all species, especially habitats, endangered species and endemic species, where we operate, and manage impacts on biodiversity in a sustainable manner.
- We adopt the principle of prevention and continuous improvement in environmental management.
- We integrate the principle of environmental protection and development into all our activities and processes.
- We regularly assess the environmental impacts that our activities may cause.
- To manage the environmental impacts of our operations, we apply the sequential approach of avoiding, minimizing, repairing and/or compensating for any environmental damage that may occur.
- We expect our business partners and other stakeholders to respect the environment and contribute to environmental protection, and we support the creation of environmental awareness..
- We expect our suppliers to establish environmental management systems, commit to continuous improvement and environmental protection in order to increase their environmental performance in line with national and international regulations, sustainable development and circular economy principles.
- In order to achieve our “carbon neutral” target, we monitor greenhouse gas emissions in our products, services and investments within a life cycle approach, calculate the carbon footprint and implement mitigation measures..
- In order to ensure the sustainable use of natural resources, we ensure the rational and sustainable use of water in our operations, manage the risks of water scarcity and ensure the return of used water to the environment.

- We establish waste management systems and processes in full compliance with national and international regulations to support environmental sustainability..
- We minimize waste generation and encourage recycling. In order to comply with the Zero Waste principle, we ensure the recycling of recyclable materials and minimize the impact of waste on nature.
- We implement regular training programs to inform and instill environmental awareness in all our employees.
- We periodically report on the realizations of our approaches, policies and practices aiming to protect and improve the environment within the framework of transparency.

**Our Corporate Governance Policies are one of the cornerstones of our strategy and an integral part of our business culture.**
